

Woman's Relief Corps.

Mrs. Brown, the Chaplain, Gives An Interesting Account of Peruina.

MRS. MARY M. BROWN.

Mrs. Mary M. Brown, President of the Y. W. C. T. U., of East Providence, R. I., is also Chaplain Woman's Relief Corps, and Past Department President of the W. M. C. U. of the State of Rhode Island. This prominent lady writes an open letter to suffering women all over the United States. Her letter is as follows:

The Peruina Medicine Co., Columbus, Ohio.

Gentlemen—Socially as well as officially, I meet a large number of women, old and young, bright, intelligent women who do their own thinking and form their own opinions. You will therefore be pleased to know that Peruina is a favorite remedy among women, and that it is generally considered superior to any prescription known in cases of catarrh and weakness peculiar to the sex. I have had occasion several times in cases of cold and depression to use Peruina and have found it very effective.

MARY M. BROWN,
149 Grosvenor Ave.,
East Providence, R. I.

The Jimplecute.

M. I. TAYLOR,
Editor and Proprietor.

Friday, Sept. 3 1909.

OFFICE OF PUBLICATION—Corner Austin and Vale Sts., Jefferson, Texas.

Entered at the Post-Office at Jefferson, Texas, second-class mail matter.

Copies of the Jimplecute in wrap pers ready for mailing, can always be had at the office by single copies or the dozen.

Indications now are that it will be fifteen cent cotton this fall.

An invitation from the board of directors of the International Fair Association, San Antonio, also a season pass is acknowledged from the president, Vories P. Brown to the editor of the Jimplecute. This is the eleventh annual fair and opens from Nov. 6th, to 17th '09.

The Jefferson Iron Co. have a large force of men making repairs at the large furnace one mile north-east of the city, which they expect to be operating at an early date. The company also have large forces at their ore mines in Marion and Cass counties, getting ore for the furnace here, and for their furnace at St. Louis, also.

That newspaper story stating that Chas. M. Schwab the steel magnate had bought up thirty-six thousand acres of iron ore lands in and about Marion county, is being denied as lacking confirmation. The owners evidently appreciate the value of their ore lands and the magnate couldn't find that much on the market perhaps.

Congressman Morris Sheppard was in Jefferson Tuesday, having come direct from Alabama, where he had been called to deliver an address—to go with mayor B. F. Sherrell and R. B. Walker to Dallas, where a hearing of Cypress river was to be held before the U. S. Engineers, a full report of which is given in this issue. This report means much for Jefferson and all this section of the State.

Why should not Marion county have an exhibit at the State Fair at Dallas this fall? She could get up as creditable exhibit as many counties, and even better; yet we have no space at our State Fair to show that Marion county is in Texas. With just a little time in saving the finest specimens of vegetables, fruits, grains etc., an exhibit could be sent that would be of vast benefit to the county.

CYPRESS RIVER HEARING BEFORE CAPT. WALDRON

CONGRESSMAN SHEPPARD PRESENTS ARGUMENT IN MATTER

Want Look at Caddo Lake and a Channel Over to Red River—Jefferson People Present

From the Dallas News, Sept. 2.

Argument in behalf of certain proposed improvements on Cypress river was presented yesterday to Capt. A. E. Waldron, U. S. engineer in charge of river and harbor work in Texas, by Congressman Morris Sheppard of Texas, mayor B. F. Sherrell and R. B. Walker, of Jefferson.

Request had been made for the construction of a lock at the dam already recommended by the government engineer to be erected at the foot of Caddo Lake and also for a channel connecting the dam with Red River. Capt. Waldron, before submitting his recommendations to the chief engineer, had asked the people of the district to give him certain information, and the hearing yesterday morning was for that purpose.

In presenting argument to show that the project is commercially justifiable Mr. Sheppard cited the partial tonnage for 1908 of the 11 counties within a radius of 100 miles of Jefferson, taking the important shipping points in Marion, Harrison, Gregg, Franklin, Titus, Hopkins, Wood, Upshur, Camp, Cass and Morris counties. He cited figures to show that if Jefferson was made a water point the total saving on freight rates to the people would be in the neighborhood of \$2,000,000 per year. As the total cost of the entire project is in the neighborhood of one and a half million dollars it was contended that the government could well afford to make the expenditure.

Letters were presented from members of the Texas Railroad Commission stating that if navigation were restored to Jefferson the section referred to would be given the reduced railroad rates logically following the establishment of a water point at Jefferson. A letter was received from Rail Road Commissioner Williams in which he stated that the improvement of Cypress river is demanded by every principle of business economy and that the investment was not merely warranted but imperatively demanded.

In addition to the tonnage shown in the 11 counties mentioned it was also shown that the yearly output of the Caddo oil field, located on this waterway, is almost 1,500,000,000 pounds. The immense iron ore deposits in north east Texas were also referred to and C. A. Schwab's recent visit to Texas and purchase of property in those fields was referred to.

Capt. Waldron will take the matter under advisement and make his report within the next few weeks to the Board of Rivers and Harbors. This board will then hold a final hearing at Washington and Congressman Sheppard will attend this hearing and make further argument in behalf of the project.

"In the early '70s," said Mr. Sheppard yesterday, "Jefferson was the head of navigation on Cypress River and 150 to 200 steamboats a year anchored at her wharves from St. Louis, Cincinnati, and New Orleans. There is every reason to believe that the restoration of navigation will restore to Jefferson her former glory."

The present surveys and examinations are being held in response to bills introduced in Congress by Mr. Sheppard.

If every boy and young man in the land would vow to make just as good a man as his father in all the relations of life, there would soon be a vast improvement all along the lines of industrial, social, economic, inventive and constitutional, and future generations would be immensely intellectually, morally and otherwise. The future progress and advancement of the country devolves upon the boys of today; will they be equal to emergencies, or will they be recreant to duty and the great tasks entailed upon them?

That the north pole has been unearthed at last and grasped from its hiding place is noted in the dispatches of Wednesday. Dr. Cook made the discovery after a perilous and toilsome voyage over the snows and ices of an arctic region. We have read considerably about the discovery, but can find nothing tangible to base a conclusion upon how the "pole" appeared in the presence of man. There's some inclined to be incredulous. But the incident opens the way for bolder dashes. Good for Dr. Cook!

When the government appropriation comes to reclaim our navigation, a long deferred justice will have been done, and a wide scope of country and thousands of people vastly benefited.

September came in hot and dusty, with few indications of fall weather that all are longing for after the hot and scorching month of August.

The Coming International Fair

From the announcement by President Brown of the attractions already arranged for and the preparations already made or being made there appears to be ample promise of a great San Antonio International Fair and Exposition this autumn.

All the buildings on the grounds will have been remodeled and freshly painted before the Fair opens, the grounds are to be beautified with plants and shrubs and walks made hard and smooth and everything put in fine shape before the exhibits are installed.

Greater efforts than ever before are being made for a splendid agricultural and live stock display and the merchants and business men of the city have promised a more active and generous co-operation in making the Exposition Hall an attractive resort. The Mexican government is having a comprehensive exhibit of Mexican industries and resources assembled for the coming Fair, and will in addition send one of the best military bands with the compliments of the President.

There will be, according to official announcement, a better line of amusements than ever before, and they have already been contracted for. Seeing what others have done in the field of workshop, on the farm or in city, farmers, stockmen, artisans—everybody with a speck of ambition desire to progress and may obtain new ideas for going ahead with a purpose to emulate, if not to excel.

But people like to be amused as well as instructed, and when they go to the Fair they look for some sort of novelty, something to entertain them, that is not likely to be found elsewhere. So there will be horse races, automobile races on the tracks, many side shows of the best class, free attractions, and best of all, alrship ascensions daily; thus giving visitors to the Fair an opportunity to see the modern dirigible air craft circle overhead and come back to the starting, to land.—San Antonio Express

BIG DEAL REPORTED IN TEXAS ORE LANDS

Special to Dallas News:

New York, Aug. 31.—It is reported here that Chas. M. Schwab and his associates have closed an option on 36,000 acres of iron ore lands near Hughes Springs, in Marion county Texas, and that he also holds options on other lands in Cass and Upshur counties.

TEXAS SYNDICATE TO ACT

It is also said that on the promised development of those ore lands about 2,000 acres of mineral land in Cherokee, Rusk and Harrison counties will be taken up by another syndicate composed of Texas capital largely, but in which some of the independent steel concerns will have an interest.

REPORTS CONCERNING TEXAS

A report says that a steel mill is to be put up at Port Arthur, with Jno W. Gates at head, also that a Duluth syndicate is to build a steel mill and ore docks at Texas City. Another report is that Port Bolivar is to be made the concentrating point for the ores. There seems to be two or three syndicates scheming and made active by Mr Schwab's recent visit to Texas.

Deputy Briley Killed by Constable Anderson.

Texarkana, Texas, Sept. 2.—Cliff Briley, a deputy sheriff from Bowie County, was shot and fatally wounded by Melvin Anderson, a deputy constable of the Texarkana precinct, same county, this morning at 1:15 o'clock. Briley was taken to the local sanitarium where he died in an hour.

A 45-calibre revolver was used by Anderson who fired the only shot. He surrendered to Arkansas officers immediately, the shooting having happened on that side of the line.

Both men are well known. Briley being of an old family of this city and a brother to the city secretary. Both are good officers.

Dr. Pierce Dead.

Dallas, Texas, Sept. 2.—A special to the News from Denton, Texas, says:

At an early hour this morning, Rev. T. R. Pierce, one of the best known ministers of the Methodist Episcopal Church South, in Texas, died at his home in this city, 57 years of age.

Dr. Pierce was a descendant of the late Bishop Pierce and was high in the councils of his church.

Yellow Fever at La Guayra.

Washington, Sept. 2.—

Surgeon-General Wyman of Marine Hospital Service, was today advised by cable of the appearance of yellow fever at La Guayra, Venezuela. The number of cases was not given.

The killings and crime that occur from whiskey drinking are noted in the daily press each day. Whiskey sets a man crazy yet the poor creatures will drink it and kill some innocent person.

LOSING FLESH

in summer can be prevented by taking

SCOTT'S EMULSION

It's as beneficial in summer as in winter. If you are weak and run down it will give you strength and build you up. Take it in a little cold milk or water. Get a small bottle now. All Druggists.

THE STANDARD OF THE WORLD.

Prospect Dots.

To Jimplecute.—I will write you a few lines, the first in life. Cotton picking is the order of the day. There is a singing school going on at Shioh; also at Friendship, ten days each; taught by Prof. McNeal. A singing school was also taught at White Oak, by Prof. A. L. Reed. Everybody should begin to get up in singing; it is a great accomplishment.

I attended a nice and enjoyable time at Mr. W. R. Davis' Saturday night; had cake and soda pop; and some excellent music on graphophone. Those present were, Susie Smith, George Simmons, Eva Howard, Ollie Grubbs, Vera Howard, Ruby Grubbs, Minnie Lee Simmons, Okla Youngblood, Alice Suber, Fannie McAdoo, Rosa Grubbs, Lucile Smith, Sadie McAdoo, Mary McAdoo, Leato Stephens, Mrs. Josie McAdoo and Mrs. Fowler. Prof. Oliver McNeal; Messrs Horace Suber, Horace Smith, Horace Holland, Postell Moseley, Dayton Smith, Augusta Brantley, Roscoe Brantley, Haskell Davis, Wm. Suber, Edgar McAdoo, Shevin McGuffin, Broas Algood, Lawrence Bramlet, Louis Stephens, Taylor Simmons, Luther Grubbs, Jack Hill, Thompson Grubbs, Jim McAdoo, Luther Williams, Henry Granberry, Russell Davis, Earl and Beal Youngblood, Cleo Clinkscapes. After having all the fun we were looking for, we returned home.

Sunday evening we attended a nice singing at Shioh. Mrs. Anna Hall and daughter, are visiting her parents Mr and Mrs G. W. Grubbs, from the west. I will now ring off. S. B.

From Lasater on the Rhine.

To The Jimplecute.—The protracted meeting that has been in progress for quite awhile at this place closed today, with the following results: One by restoration, two by reclamation and three by absorption (immersion). Our new justice, Squire Bennett, says from now on he's going to have order if he has to jerk it out of cases. One night during the meeting Mr. Bennett ran two rousetaboute to Jumpingoffplace, and but for ye scribe he would have jumped off after them; 'rah for Charley. "Roll on sweet moments, roll on," and let these good people get home. King cotton raised his cepter since the meeting, and the fleecy staple is getting in shape, while the boll weevil is relegated to the rear.

P. S. Lee Lemmon says they flung him overboard because he tuned up his fiddle to the highest string, and played the same good old tune over and over, whereas the ancients fiddled and danced all up and down the river Jordan, while Pharaoh and his hosts were strangling forty leagues under the sea! Stonewall No. 2

Mr. F. M. Pomeroy, the genial and efficient M. K. & T. agent at the depot, was relieved yesterday by Mr. G. W. Russell, who has been the agent at Emery. Mr. Pomeroy returns to Emery to resume the agency he left when he came here. He owns property there and was thus induced to go back. The exchange of places by the agents was the result of a mutual agreement, and sanction by the authorities. We regret to lose Mr. Pomeroy, and can commend him for his efficient work here and trust that he and his excellent wife may meet the cordial reception of old friends that they so eminently deserve. Mr. Russell came ahead of his family, and is engaged today unloading his car of household goods and placing them for the reception of his family. They will occupy the Mrs. Dodson residence, recently vacated by Mr. McCloskey, lately foreman of this section. We welcome Mr. Russell and family, and hope they may be pleased with their present abidings.

List of Letters

Remaining in the Post Office at Jefferson, Marion county, Texas, Thursday, Sept. 2, 1909.

Gents—O B Lewis (3), Heggie Matie, Jack Minter, J J Shaddox, L G Zachry, Read—Annie Bettie, M Davidson, Pearl Easley, Mapy Gill, Bob Woods.

Misses—Etta Griffin, Rosa Hawkins, Lorine Hamilton, Dessie Johnson.

Persons calling for above letters please say "Advertised."

HAL SINGLETON, P. M.

Mr. Gillespie has a force of young men engaged in remodeling and connecting the two big stores in the Hussey & Whelan block, getting it ready for the occupancy of that progressive firm of Perkins Bros. & Co. The boys are quite expert in the handling of tools, and are commendable for the industrial traits and active display of manly spirit.

5 or 6 doses "666" will cure any case of Chills and Fever. Price 25c.

LOCAL OPTION ELECTION.

It is rumored that a petition for a local option election in this precinct is being circulated by a whiskey man. They will not have a walk-over when they try it. We will see if the people are tired of local option. They shall have a lovely time should they succeed in bringing on an election. But why do they want an election? If as they claim there is more whiskey sold in Jefferson than when we had saloons, it is certainly not to their interest to bring them back. They know this is not true. Though the law has been evaded, and I believe violated in every possible way, there is not a tenth as much whiskey drunk and sold here now as when we had eight saloons. Jefferson is in better shape today than at any time in the past seven years under the saloon. From 1902 to the local option election in 1907, seven men and one woman were killed in Jefferson. Another young man was shot in a saloon; two young men committed suicide; two or three negroes were killed. The Lord and the saloon keepers only know how much other devilry was done in those five years.

I can't think we want a return of those days of crime. But it is claimed that local option hurt or ruined business! How? Whose? The panic came in 1907 while we had eight saloons, some months before local option; and that caused the drop in business as every one knows. But it is claimed tax es will be increased, as we must have the money that saloons supplied. Well, that argument is scarcely worth noticing, but the truth of the matter is, our city tax rate was 20 cents less on the \$100 in 1908 than in 1907, when there were eight saloons. The moral condition is greatly improved. There has been more improvements and a better, quieter city every way than at any time in the past seven years.

Who would be benefitted by bringing back saloons? Half dozen men who have houses to rent; the undertaker, the brewers and whole sale liquor dealers of other cities. What class of people do saloons attract? Gamblers, hoodlums, and all kinds of bad men and women. They build no churches or schools, but on the contrary they require joints. They build no factories; capital is not hunting saloon towns for investment. If Jefferson ever has saloons again it will be far worse than ever before. Let us not go backward, but forward. J. Woodson.

A new arrival Aug. 24th at the home of Jap. Jackson and wife, a little son born to Mr. and Mrs. W. Richardson, and they call him Tom Stallcup. Grandpa Jap is proud of his two grand sons, and says he now has a team.

JIMPLECUTE OFFICE

A Heavy Load to Carry

"ALL IS WELL THAT ENDS WELL."

Along with dyspepsia comes nervousness and general ill-health. Why? Because a disordered stomach does not permit the food to be properly digested, and its products assimilated by the system. On the other hand the blood is charged with poisons which come from this disordered digestion, and in turn the nerves are not fed on good, red blood, and we see symptoms of nervousness, sleeplessness and general breakdown. It is not hard work that does it, but poor stomach work. With poor, thin blood the body is not protected against the attack of germs of grip, bronchitis and consumption. Fortify the body at once with Dr. Pierce's Golden Medical Discovery—a rare combination of native medicinal roots without a particle of alcohol or dangerous drugs.

No man is stronger than his stomach. Let the greatest athlete have dyspepsia and his muscles would soon fail. Physical strength is derived from food. If a man has insufficient food he loses strength. If he has no food he dies. Food is converted into nutriment through the stomach and bowels. It depends on the strength of the stomach to what extent food eaten is digested and assimilated. People can die of starvation who have abundant food to eat, when the stomach and its associate organs of digestion and nutrition do not perform their duty. Thus the stomach is really the vital organ of the body. If the stomach is "weak" the body will be weak also, because it is upon the stomach the

How Co-operation Helps Georgia Peach Growers.

A press dispatch from Atlanta says that the Georgia peach crop this year will net the growers a profit of half a million dollars. Last year 6,000 cars brought about \$1,000,000; this year 2,000 cars brought about the same amount. The difference in price is attributed largely to better methods of marketing the crop.

"This year for the first time, Georgia growers organized into a mutual benefit exchange, modeled on the lines of California fruit shippers' associations. The raisers of other great Southern fruit crops, particularly oranges, are organizing similar associations. In each case Southern associations have followed the California idea of 'keeping the crop rolling,' in freight cars and selling it as it moves by means of reliable agents of the associations."

Here is more proof, if more proof could be needed, that it pays farmers to co-operate, and that the way to co-operate is to go at it on a business basis. By working together for a common object the farmers of any neighborhood, or those engaged in any particular line of work, have it in their power to largely increase the profits to be derived from their work. But all these co-operative associations must be organized on strictly business principles. It isn't worth while to take up the half-dozen ideas of any promoter who is governed more by sentiment than by business sense or to expect sporadic enthusiasm to take the well-formulated plans of work.

If you see any place where your neighbors and yourself could work together to mutual advantage, call their attention to the opportunities you are neglecting and see if you can't agree on a plan for concerted effort. The money will grow on you, and will be a money-making habit.—Starkville (Miss.) Southern Farm Gazette.

Don't waste your money buying plaster when you can get a bottle of Chamberlain's Liniment for 25 cents. A piece of flannel dampened with this Liniment is superior to any plaster for lame back, pains in the side or chest, and much cheaper. Sold by Allen Urquhart.

News was received Tuesday morning that a robber had broke into the house of E. C. Latham living about seven miles north of city on route No. 2. They had taken all of his provisions, also a bracelet of his daughter. There is no clue yet.

body relies for its strength. And as the body considered as a whole is made up of its several members and organs, so the weakness of the body as a consequence of "weak" stomach will be distributed among the organs which compose the body. If the body is weak because it is ill-nourished that physical weakness will be found in back and knees, in hands and feet equally. So also will the weakness be equally distributed among the organs, heart, liver, kidneys, etc., being proportionately weak according to the amount of the reduction of their daily ration of nutriment.

By way of example take the case of the Assistant Treasurer of the Catholic Foresters at Quebec, Mr. Louis Péro, who writes:

"For years after my health began to fail, my head grew dizzy, eyes pained me, and my stomach was sore all the time, while everything I would eat would seem to lie heavy like lead on my stomach. The doctors claimed that it was sympathetic trouble due to dyspepsia, and prescribed for me, and although I took their remedies regularly, I felt no better. My wife advised me to try Dr. Pierce's Golden Medical Discovery. I began to take the doctor's medicine, she bought me a bottle and we soon found that I began to improve, so I kept up the treatment. I took on flesh, my stomach became normal, the digestive organs worked perfectly and I soon began to look like a different person. I can never cease to be grateful for what your medicine has done for me and I certainly give it highest praise."

THE SECRET OUT.

To refute the many false and malicious attacks, bogus formula and other untruthful statements published by competing and disgruntled medicine men concerning Doctor Pierce's World-famous Family Medicine the Doctor has decided to publish all the ingredients entering into his "Golden Medical Discovery." Hereafter every bottle of this medicine leaving the great Laboratory at Buffalo, N. Y., will bear upon it a full list of all the ingredients entering into the compound, printed in plain English.

These ORIGINAL Little Liver Pills, first used by an old Dr. R. V. Pierce over 40 years ago, have been much imitated but never equalled. They're made of purely vegetable, concentrated and refined medicinal principles, extracted from native American roots and plants. They speedily relieve and cure foul, torpid and deranged stomachs, biliousness and bowels, and attendant distressful ailments. One or two a laxative, three or four a cathartic.
